PROFESSIONAL SUMMARY

Results-driven technology professional with experience developing full-stack business systems, AI-powered healthcare applications, and operational platforms while supporting quality assurance processes across 70+ client brands. Skilled in Next.js, TypeScript, Python, JavaScript, Supabase, OpenCV, and Agile development practices, with a proven ability to collaborate with executive stakeholders, healthcare professionals, and multidisciplinary teams to deliver impactful real-world solutions.

WORK EXPERIENCE

Cloud Campaign | *Quality Assurance Specialist*

Remote (Boulder, Colorado, United States)

January 2026 - Present

- Supported quality assurance and content review processes across 70+ client brands, ensuring publication-ready marketing assets.
- Create and refine social media content aligned with client branding, messaging frameworks, and industry-specific marketing objectives.
- Collaborate with designers and content teams to identify inconsistencies, optimize creative deliverables, and maintain quality across high-volume marketing campaigns.

Frozen Shoulder Rehabilitation Decision Support System | *Lead Developer*

Cavite State University – Main Campus

November 2025 – May 2026

- Developed a computer vision-based rehabilitation system using Python, OpenCV, and MediaPipe, achieving 91.2% posture compensation detection accuracy and 86.4% range-of-motion assessment accuracy against physical therapist evaluations.
- Designed a custom fuzzy logic decision engine for real-time exercise deterioration and fatigue assessment, enabling explainable AI-driven rehabilitation feedback.
- Built a HealthTech desktop application integrating live pose tracking, automated exercise analysis, video annotation, and session monitoring, validated with 5 licensed physical therapists, 5 healthy participants, and 2 shoulder pathology patients.

GYG Power Systems Management System | *Full-Stack Developer*

Quezon City, Metro Manila, Philippines

July 2024 – August 2025

- Developed a full-stack business operations platform using Next.js, TypeScript, and Supabase, collaborating directly with the CEO, Vice CEO, and Senior Design Engineer to digitize project management workflows.
- Engineered a cloud-based document management system supporting 15+ engineering document types, including approval tracking, version control, and secure file access.
- Designed and implemented a PostgreSQL database architecture powering project tracking, task management, reporting, notifications, and operational analytics.

Resource Hive – Reservation & Resource Management System | *Full-Stack Developer*

Cavite State University – Main Campus

Oct 2024 – Jan 2025

- Developed a reservation and resource management platform serving 40+ faculty members, streamlining scheduling workflows and resource allocation.
- Developed key system features including reservation workflows, real-time availability tracking, and automated notification mechanisms.
- Collaborated within a 7-member Agile development team to deliver a reservation management platform serving 40+ faculty members.

TECHNICAL PROFICIENCY

Programming Languages: Python, TypeScript, JavaScript, SQL, Java, PHP

Frontend: Next.js, React, HTML, CSS, Tailwind CSS

Backend & Database: Supabase, Firebase, MySQL

AI & Computer Vision: OpenCV, MediaPipe, Fuzzy Logic Systems, ChatGPT, Claude, GLM

Tools & Platforms: Git, GitHub, Figma, VS Code, Google Workspace

Communication: Zoom, Google Meet, Calendly, Microsoft Teams

Quality Assurance & Digital Operations: Content Auditing, Brand Compliance, Creative Asset Review

EDUCATION

Bachelor of Science in Computer Science

Cavite State University – Main Campus, Indang, Cavite

September 2022 – August 2026
